El Producto Bruto Geográfico (PBG) refleja la actividad económica de las unidades productivas ubicadas en el territorio de referencia. Se corresponde con el Valor Agregado Bruto, que es el valor de los bienes y servicios finales producidos en dicho territorio en un año.

El precio de productor es el percibido por el productor pero incluyendo los impuestos sobre los productos. Registra el valor del producto a la salida del Establecimiento, excluyendo por lo tanto los márgenes de transporte y comercialización, así como el impuesto al valor agregado (IVA).
